

Just before Christmas 2002 Alastair Benn explained his idea for a bathroom television; we thought "mad dogs and Englishmen." One year later we think he's a God!

Here is the best of British; in concept, in design and in manufacture. Already a huge hit with several major hotel groups across the globe, we have put together a selection of screen options for you to choose from for your own shower or bathroom.

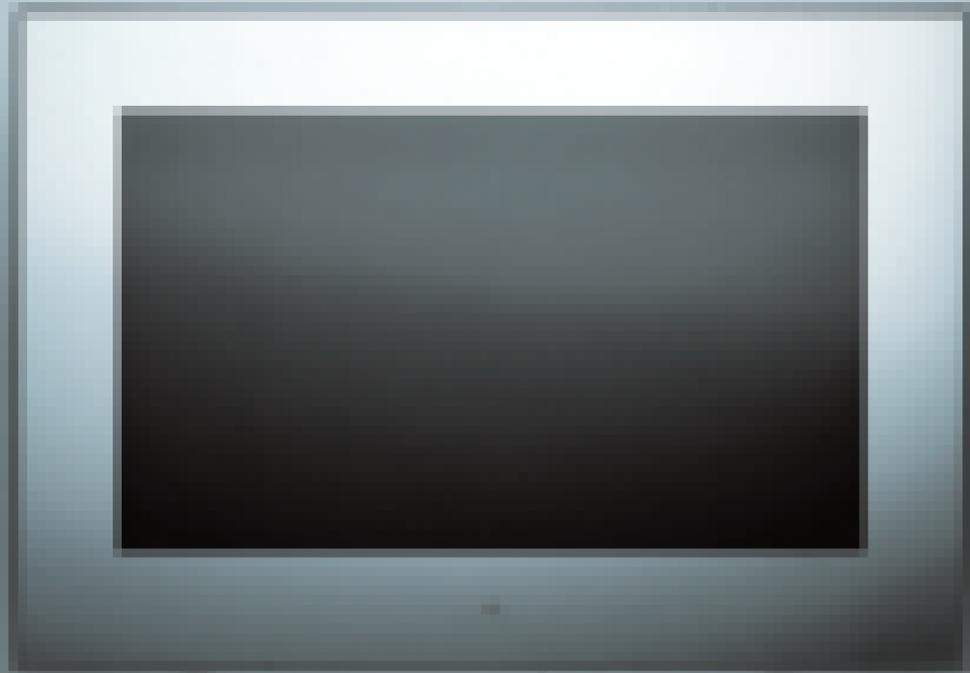

Aquavision is available in 10" and 15" LCD screen options and in 17" and 23" wide-screen formats all with remote control and in a choice of screen finishes including white, silver and mirror.

The combination of bathroom mirror, towel warmer and television, seemed an obvious addition to the Aquavision concept.
